SKILLS

I acquired a number of skills learning at home through online resources, post-secondary classes and on the job work experience. These include:

- Knowledgeable in object-oriented development and data structures by completing the Intermediate Programming and Advanced Programming post-secondary classes. Programming languages learnt in these classes include:
    - Java, C, and C#
- Excelled in the mobile application post-secondary classes which involved working with Android Studio and Xamarin. Programming languages used in these courses include:
    - Swift and C#
- Able to succeed in an online environment by finishing post-secondary education classes online and self-learned multiple frameworks and libraries which include:
    - Vuetify, Symfony, and Mocha/Chai
- Helped to troubleshoot and fix customer's satellite cable / internet problems working as a satellite technician.
- Able to work independently and as part of a team in a simulated agile work environment creating an open source web application for a school project.

EDUCATION

Computer Systems Technology Diploma

Saskatchewan Polytechnic, Saskatoon SK

September 2019 - Present

Expected completion: June 2021

Relevant Courses: Advanced Programming, Internet Programming / Web Applications, Advanced Mobile Application Programming, IT Development Project, IT Development Project Management

PROJECT EXPERIENCE

Multi-Unit Residential Recycling Group Project

Saskatchewan Polytechnic, Saskatoon SK

September 2020 - Present

- Collaborated as a team to brainstorm ideas on how to incorporate different features into creating a fully functional web application.
- Took part in daily stand ups, client meetings, and design meetings.
- Implemented the Vue JS framework and Symfony framework to create the foundation of our web application.
- Used the Test-Driven Development process of creating tests first and then writing code later. Mocha & Chai were implemented for the test libraries.

WORK EXPERIENCE

Team Member (Electronic Fulfillment Center)

Princess Auto, Prince Albert SK

January 2019 - October 2020

- Helped the customer to troubleshoot problems over the phone when problems would arise from ordering products from the online store.
- Fulfilled customer's online orders by logging into the company's system, checking current orders, and preparing the orders for shipment.
- Knowledgeable in the company's software. Able to quickly learn in a short amount of time and work efficiently.

Satellite Cable/Internet Technician

Extreme Theatre, Prince Albert SK

June 2019 - August 2019

- Installed Shaw Cable, Bell Express and Xplornet satellite dishes into customers homes.
- Setup additional equipment, which included cable receivers, modems, routers and wiring.
- Worked service calls and helped to troubleshoot when a customer was experiencing problems with their service. This included networking and hardware issues.
- Worked efficiently as part of a team and independently.

ACADEMIC ACHIEVEMENTS AND AWARDS

SaskEnergy Indigenous Award

August 2020

- Awarded to indigenous students with academic achievement, community involvement and financial need.

Nutrien Bursary for Indigenous Students

February 2021

- Awarded to indigenous students with academic achievement and financial need.
